

Qulon Sipline

Individual control module for Powerline solutions

Qulon Sipline is additional module that provides individual remote light control of luminaires with installed PLC modules through power lines (PLC) using Sundrax's proprietary Sipline technology to communicate luminaire node controller with central gateway. Additional control wires are not required. Mounted inside existing lighting cabinet together with Qulon-C (Central Gateway). Connected to the central controller Qulon-C via RS-485 interface (ModBus). Acts as a master to send/receive data to/from PLC modules (slaves). It communicates with the slaves using PLC interface via existing power lines.

Key Features

- Provides individual control and power regulation of discharge lamps with an electronic ballast and a built-in Sipline node
- Provides individual control and power regulation of LED lamps with a built-in Sipline node
- Connected to Qulon-C over RS-485 (MODBUS RTU)
- Full galvanic isolation of RS-485 interface
- Built-in power supply ~100-270 VAC

QULON CMS

QULON is a powerful yet extremely flexible Central Management System for street lighting. A combination of software applications and different hardware technologies that will offer you full control over any kind of lighting network enabling activity scheduling, real time faults notification, remote meter reading, performance analysis, custom dimming scenarios creation, maintenance workflow management and much more, increasing efficiency and cutting down costs.

Individual control module for Powerline solutions

Technical Specifications

Mechanical

- Housing: DIN mounted case (8 modules)
- Material: Metal, Plastic
- Dimensions, mm: 142(D) x 105(H) x 75(W)
- Mass: 0.45 kg
- Mounting: DIN-rail in the power cabinet

Power & Electrical

- Input Voltage: ~100-270 VAC, 50/60 Hz
- Number of phases: 1-3
- Input Power (max): 5 W
- Mains Fuse: 0.5 A

Environmental

- Operating Temperature: -40...+70°C
- Storage Temperature: -50...+80°C
- Operating Relative Humidity (max): 95%
- IP Rating: IP 20
- Certification: CE, RoHS
- Warranty: 36 Month (Return to base)

Inputs / Outputs

- Connectors: Terminal blocks 2EDGVC, 15EDGVC

Interfaces and Protocols

- Serial interface: RS-485, PLC
- Max length of RS-485 line: 1500 m
- Communication with node: CENELEC EN 50065-1 (band C)

Configuration / Indication

- Setup: Remote via Qulon-C
- Indication: LEDs for Power and RS-485 activity

Package Contents

- Qulon Sipline module
- User guide
- Connectors kit
